

A/C SYSTEM W/SIGHT GLASSES

MAIN FEATURES

- Allows students to visualize A/C systems like never before
- Orifice tube positioned to allow students to see refrigerant state change
- A must for every A/C class

DESCRIPTION

The EM-140-14 A/C System with sight glasses is optional equipment that can be installed on any Consulab engine trainer with HVAC. In order to visualize the refrigerant condition in the air conditioning system, some hoses have been replaced by transparent tubes. Fluorescent coloring is added to the refrigerant to facilitate viewing.
