

Position offered: Mechanical Engineering Technician / Designer
Start date: As soon as possible

Here are the challenges that are waiting for you:

At Consulab, we offer you the opportunity to put your genius to work and contribute to the success of major projects in various fields and technologies of the industry. As an expert in mechanical design, you will be a resource person for the design of high technology systems, equipment and products in the automotive education sector and many more.

- Design from a specification and / or information using SolidWorks;
- Develop the nomenclature of parts and / or options for new assemblies or revisions;
- Participate in the monitoring of prototype evolution;
- Collaborate with customers and suppliers of parts or equipment to resolve technical issues related to design, development and fabrication;
- Work closely with the Product, Production and Purchasing Management teams for optimal product design;
- Innovate to optimize the cost, functionality and performance of products;
- Able to select and integrate mechanical, pneumatic, hydraulic and electrical components according to the needs of the design;
- Perform other related tasks

You are a good candidate if:

- You have a **DEC** in mechanical engineering;
- You have ease in mechanical design
- You have between 5 and 10 years of relevant experience in the manufacturing sector;
- You master the *SolidWorks* design software and the Office suite: Word, Excel,
- You have good knowledge in designing metal and welded assemblies;
- You are resourceful, reliable, versatile, sociable
- You master *AutoCad software* (asset)

You stand out by the following skills:

- You demonstrate great communication skills;
- You know the manufacturing system
- You have a good command of English (an asset);
- You have knowledge of welding (an asset)
- You enjoy working in a team and facing challenges
- You distinguish yourself by your sense of innovation and analysis

Do you want to use your expertise and skills to improve products for technical education? You aspire to join the ranks of a multidisciplinary and dynamic team?

We invite you to send us your application by email or to communicate directly with Human Resources:
